G.O.A.L. – MONTHLY CHARACTERISTIC OF A LEADER

LEARNING AGILITY

Learning agility is a combination of skills that enables a person to learn, relearn and adapt quickly to changing situations. It dictates the ability to know what to do when you actually don't know what to do, by using past and present experiences to make sense of an uncertain situation. Anyone can foster and increase learning agility through intentional practice and effort. Good leaders are really good learners.
