Item 390 CUBIC CAPACITY / LINEAR FOOT RULE

Except as otherwise provided, any shipment occupying 750 cubic feet of a trailer, will be subject to the following Conditions and Definitions:

1. The cubic capacity of a shipment will be determined by multiplying the length, width and height of all articles, pieces and packaging units in the shipment(s). If Consignor tenders more than one shipment to the same Consignee on the same day, on two or more individual bills of lading, the combined cubic capacity of all shipment(s) shall be subject to the provisions in this item. If the Bill of Lading instructions or packaging in any way prohibits the utilization of the trailer space between the ceiling and the top of the articles, the height of 96" will be used in calculating the cube of each item.
2. When the cubic capacity of a shipment occupying 750, and the density of the shipment is less than 8 pounds per cubic foot (pcf), a calculated weight (cube multiplied by 8 pcf) and a class of 100 will be used to rate the shipment. The customer lane discounts will apply.
3. The linear footage of the shipment(s) shall be determined by totaling the linear footage of all articles, pieces and packaged units in the shipment(s). If Consignor tenders more than one shipment to the same Consignee on the same day, on two or more individual bills of lading, the combined linear footage of all shipment(s) shall be subject to the provisions in this item. If the Bill of Lading instructions or packaging in any way prohibits the utilization of the trailer space between the trailer ceiling and the top of the articles, or the shipment requires to be floor loaded for delivery, the linear footage will be calculated as if the entire shipment is floor loaded.
4. When the linear footage of a shipment occupies 15 feet of a trailer, may charge up to a rate of \$0.13 per linear foot per actual mile will be used to calculate the rate of the shipment.

5. Actual miles will be determined by the stem miles between the pickup location to the origin terminal, plus all linehaul miles between the origin terminal and destination terminal, plus the stem miles from the delivery terminal to the destination location. In the event either the pickup locations or the destination location is a non-direct point for Magnum, practical miles from PC miler will be used from the respective location to either the pickup or delivery terminal of Magnum to determine stem miles for that portion of the move.
 6. The minimum charges applicable via this rule (cubic capacity and linear foot) shall not be less than \$500.00 per shipment. All mileage shall be computed by the PC Miler.
 7. The provisions of this item are not applicable in connection with shipments subject to VOL and TL rates or charges or minimum charges per vehicle used.
 8. The provisions of this item are subject to applicable fuel surcharges.
-

Item 430 COLLECTION ON DELIVERY (COD) SHIPMENTS

Shipments requiring the carrier to collect payment for product being shipped, will not be accepted by Magnum LTL. In the event that the carrier inadvertently accepts a shipment requiring a Collection on Delivery (COD), carrier will notify the customer of Item 430 giving them the option to reverse the COD charges and allowing the carrier to perform the delivery without a COD, or have the shipment returned to the shipper. A charge of \$50.00 will apply for the return shipment in addition to all other applicable charges.

Item 470 DENSITY – METHOD OF DETERMINING

1. Where rates are applicable according to the density of an article as tendered for shipment, the word “density” means “pounds per cubic foot”. The cubage of loose articles or pieces or packaged articles shall be determined by multiplying the greatest straight line dimensions of length, width and height in inches, including all projections, and dividing by 1728 cubic inches (one cubic foot) to determine the number of cubic feet of the article. The density shall be determined by dividing the weight of each shipment by the cubage of such shipment.
 2. A vertical dimension (or height) of not less than 96 inches shall be used in determining the cube of any unit on top of which other freight cannot be loaded because of:
 - a. The nature of the article; or
 - b. Packaging or lack of packaging used; or
 - c. Palletization in “pyramided”, “rounded off” or “topped off” manner; or
 - d. Specific instructions by the shipper on the bill of lading; or
 - e. Specific instructions applied directly on the freight, that no other freight is to be loaded on the top of the article or double stacked.
 3. Shipments that are loaded in such a manner that determining the total cube of each package or handling unit is impractical, or shipments tendered in such a manner they cannot be transferred, will have the cubic feet calculated on the basis of linear feet of trailer occupied, times the actual height, but not less than 96 inches, times a width of 96 inches.
 4. When the width and/or height of an article is greater than or equal to 66 inches, it will be computed as having a width and/or height of 96 inches.
 5. When rates are applied according to a published tariff pallet rate or minimum charge, and the vertical dimension of the shipping unit is determined using the rules of paragraph 2 or paragraph 4 above, the provisions of Item 653 will apply.
-

Item 500 DETENTION

1. When Consignor/Consignee delay Carrier’s equipment for loading or unloading on or near the premises of Consignor/Consignee, Detention charges will begin upon expiration of the application free time allowed, and will end when the equipment is available for movement.
 - A. When consignor tenders or consignee receives more than one shipment at one time, the combination weight will be used to determine free time.

- B. Charges will be assessed against the payor of the freight charges unless payment has been guaranteed to the satisfaction of the Carrier by the Consignor, Consignee or third party. When there is more than one payor, charges will be prorated based on the weight of each individual shipment subject to the minimum charge as to noted herein.
2. Free time will begin when Carrier notifies Consignor / Consignee that the equipment is available for loading for unloading.
3. The following Detention charges are applicable:
 - A. For Detention With Power:
 1. \$2.50 per Trailer or Vehicle for each 1 minutes or fraction thereof, subject to a minimum charge of \$50.00.
 2. Free time will be determined as follows:

<u>Weight in pounds</u>	<u>Free Time per Stop</u>
Less than 1,000	15 minutes
1,000 to 4,999	25 minutes
5,000 to 9,999	35 minutes
More than 9,999	45 minutes

 - i. Non-working periods, such as meal or rest breaks, not exceeding one hour, will be excluded from the computation of free time.
 3. If loading or unloading is not completed by the end of the Business Day, Consignor/Consignee has the option to:
 - i. Request Trailer(s) without Power to remain. Free time will cease, and Detention Without Power will begin with applicable free time.
 - ii. Request equipment leave the site and return the next Business Day when loading or unloading will resume. Free time will be suspended until equipment is returned. If free time has expired, storage and redelivery charges will apply without additional free time.
 4. Detention With Power will also apply when Carrier assists in loading, unloading, counting, or checking the freight.
 - B. For Detention Without Power, the following charges and provision will apply.
 1. \$125.00 per Trailer for each 24-hour period or fraction thereof, excluding non-Business Days.
 2. Free time will be 24 hours, excluding non-Business Days.
 3. Subject to Carrier's discretion and the availability of equipment, Carrier may spot trailer / set for loading or unloading on the premises or designated site as requested by Consignor/Consignee providing a delivery receipt is tendered to Carrier at the time that the trailer is spotted.
 4. Carrier responsibility for shipments will begin when Carrier takes possession, custody, and control of shipments, and will end when Carrier spots equipment pursuant to Consignor or Consignee's request.

Item 560 EXTRA LABOR – LOADING OR UNLOADING

1. Rates referencing this Schedule are based on the Truck and Driver ONLY. Whenever additional help is required to load, unload, flag traffic, protect shipments, etc., such help, when requested by the Consignor or Consignee, will be provided at the rates in this Item. Extra labor will NOT be furnished, unless requested by the Consignor or Consignee, and charges are agreed to by the payor. At each location where extra labor is used, the charge therefore (in addition to all other charges) will be as follows:
 - A. Monday through Friday (except Holidays): \$25.00 per 15 minutes or fraction thereof, subject to a minimum charge of \$150.00.
 - B. Saturday, Sunday, or Holidays: \$45.00 per 15 minutes or fraction thereof, subject to a minimum charge of \$300.00.
2. Time shall be computed from the time the extra labor leaves the Carrier's terminal, or is released from the previous job and shall continue until the extra labor returns to the Carrier's terminal. The provisions of this Item do NOT obligate the Carrier to furnish extra labor if such labor is not available at the point of loading or unloading.

Item 561 FUEL SURCHARGE

Except as otherwise provided, all charges for linehaul transportation resulting from rates and/or charges named in Tariffs, Contracts, or Pricing Agreements will be subject to a Fuel Surcharge (FSC) as provided herein. In the event of a disruption to the weekly release of the U.S. National Average Diesel Fuel Index on Monday, the Fuel Surcharge will remain unchanged until it is updated with the most current average price on the first business day following the next update to the U.S. Department of Energy website.
