

ONE MAGNUM MONTHLY

June 2026

One Team. One mission. OneMagnum.

What's New in Truckload?

It has been an exciting year of progress at Magnum LTD. We are investing in the future with new technology, upgraded equipment, improved processes, and added support across our operations team. The rollout of the Isaac telematics system is already helping us improve communication, visibility, safety, and efficiency, while our continued investment in new equipment keeps our fleet strong and ready for growth. With Lisa Flugga and Rich Kallay joining our planning team, we are building even more momentum. Magnum is moving forward with confidence, innovation, and a strong focus on our drivers, customers, and team.

The ISAAC telematics system is an all-in-one trucking technology platform that combines ELD compliance, driver logs, vehicle inspections, GPS tracking, dispatch communication, document scanning, driver coaching, and fleet performance data. For drivers, it works like an in-cab digital command center that helps manage daily tasks and stay compliant. For dispatchers and fleet managers, it provides real-time visibility into truck location, Hours of Service, safety, messaging, and operational efficiency.

NEW 2027 TRUCKS

Special Edition T-Shirts & Sweatshirts

The Annual Clothing Sale is back!

This is your chance to grab inexpensive Magnum-branded clothing with a special design created just for this year's sale.
